Where & When

Be in control of every aspect of your business by knowing where your assets are.

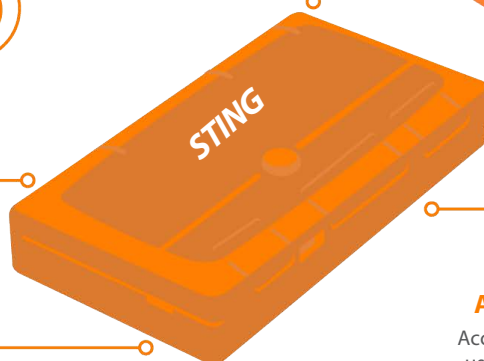

Tamper detection

Tamper detector for high value cargo applications.

Battery Operated

Batteries last up to 4 years with 1 daily update.

Adaptive Tracking

Accelerometer and GPS data used intelligently to detect movement and send live updates.

Rechargeable via USB

Internal battery pack is rechargeable with a Micro-USB cable

OUR SOFTWARE SOLUTIONS

This ultra-compact GPS tracking device, which is wireless and rechargeable, is designed to track high value parcels, cargo, and other valuable assets where the battery life is managed by the frequency of updates and performance settings.

REAL-TIME VISIBILITY SOFTWARE

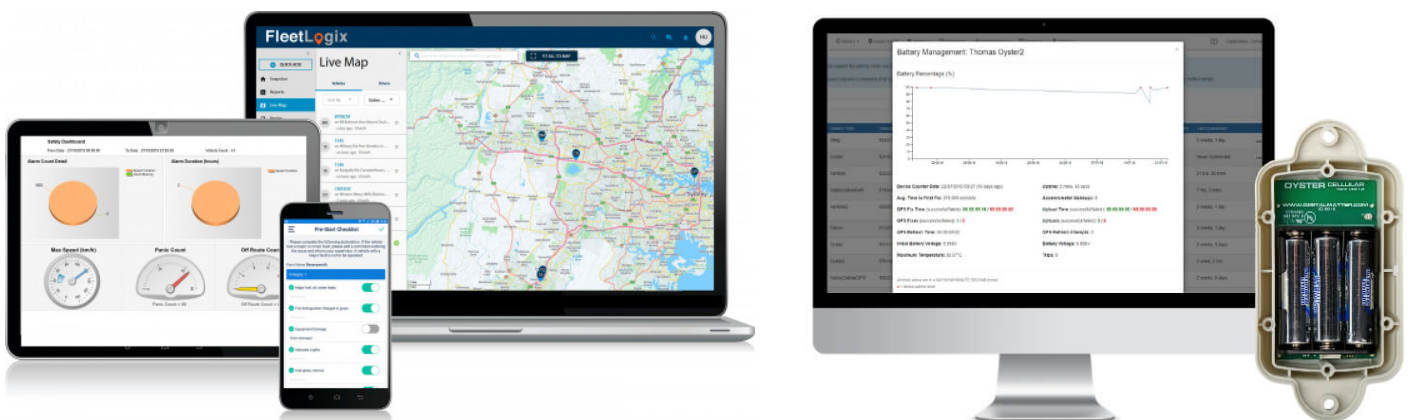

Mobile Application - Mobi

Mobi is a web-based application that allows you to monitor your vehicles from almost anywhere – using a smartphone or tablet.

Web based Vehicle Tracking - Online

Online is a web-based application that enables you to remotely monitor your vehicles from any computer with an internet connection.

Product Range

Our range of world-class battery-powered asset tracking devices provides businesses and consumers detailed location information based on a range of triggers to maximise battery life. Doing this our devices can last in the field up to 10 years on a set of batteries. Each product is fully tested before it leaves our warehouse with firmware being updated over the air when required. Our units are pre-configured with a range of options, including the frequency of location updates.

Our devices are intelligent and can be configured to a client's specific needs.

Products Available:

FL Oyster - Track up to 7 years

FL Remora - Track up to 10 years

FL Yabby - Lightweight and rugged

FL Guppy - Indoor asset tracking
